

INSIDE HEATED WINTER STORAGE

Haven Kakumäe is a new marina in Tallinn with the best facilities and full services.

We are proud to offer inside heated winter storage for yachts in the state-of-the-art hangar. Boathouse has an area of 4300 m² with 2 separate halls. The gate height is 9 m and 12 m in each. The big hall can accommodate vessels up to 30 m long and weight up to 130 t. Boats are lifted from water with a power hoist and safely moved inside for storage on keel blocks. The small hall is equipped with 3 levels of shelves for rack storage in addition to floor space. Boats up to 10m long can be lifted with a professional forklift and easily put inside the boathouse within 30 minutes. All the necessary procedures are conducted to prepare the yacht for winterization.

Hi-tech engineer systems maintain the constant warm temperature and normal humidity inside all year round. The fire protection system and CCTV surveillance guarantee absolute security for your yacht. All operations in the harbor are insured. The trained marina staff is always ready to provide the customers with professional support.

Comfortably all-in-one service at one location

Fix or tune your yacht during the off-season. Haven Kakumäe offers boats service and repair:
